LEO2

Efficiency at your fingertips

CASH IN A FLASH

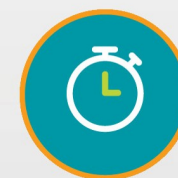

LEO2 touchscreen keyboard is designed with professionals like you. It's easy to use and optimised for busy times. LEO2 cash registers include valued £ keys. A customer hands you 5£ to pay for his coffee, click on coffee, then 5£. The change appear on the screen. The sale is complete!

MANAGE YOUR ORDERS EASILY

"A sponge cake for six for Friday?" Press on the cake, press customer order, add a delivery time, add comments, collect a deposit. Done!

DON'T MISS ANY SALES

Three customers want blueberry muffins but you don't have any more of them, the missed sales function counts the products you could have sold. An intelligent tool to manage your production accordingly and follow the customer's demand.

GO FOR HYGIENE AND SECURITY

LEO2 knows how to communicate with Glory CashRecycler. With it, the cash register will always be correct, the cash will always be secured, the conditions of hygiene will be impeccable as you and your staff won't have to handle the cash anymore. On top of it, you save the time spent counting the cash registers.

OPTIMIZE YOUR OPERATION

Turnover per hour, per week, per clerk, per customer, per product group, activity density graphs according to hours of the day. LEO2 offers the tools you need to improve ROI and manage your business. Files for the accountant exportable by email, USB key or backed up on the cloud.

KEEP TRACK OF YOURS STOCKS AND MARGINS

Your stocks appear, if you wish, on each of the items key on your cash register. Follow your margins and your objectives in real time. This way you gain visibility and stay motivated!

BE SELF-SUFFICIENT

A price to change? A new product to register? Our easy-to-use interface allows you to carry out daily operations alone and with ease.

CUSTOMER LOYALTY PROGRAM

With LEO2, create the loyalty program that suits you. Points accumulation, number of visits, with or without discount? You decide.
